Athletics at Concordia

At Concordia, we believe in what we call a student-athlete centred philosophy. Simply put, it means that the balance between academic studies and athlete activities ensures that our students benefit from the best of both worlds.

We've achieved this by designing our programme in such a way that it gives our students the opportunity to develop fully their potential in both areas.

Our Department of Fitness, Recreation and Athletics offers programmes in the areas of fitness, intramurals, skill development and athletic competition at various levels of involvement and intensity; as well it provides the necessary leadership and support.

Inter-university athletics are well established at Concordia and our men and women athletes compete at a high level of competition against universities across Canada, in the United States and, on occasion, in Europe.

On a less formal though evolving level, we also offer programmes for both men and women athletes in such sports as rugby and golf with local and provincial competition.

Athletics is an important part of life at Concordia. Our teams are competitive, our coaching staff experienced and, as we've explained, our programme is geared to bring out the best in our student - athletically and academically.

If you are genuinely interested in developing your athletic skills in an exciting and supportive environment while getting an excellent education, then Concordia's athletics programme is definitely the place for you.

Concordia Today

Concordia has a long history of offering higher education to men and women of all ages and backgrounds, many of whom might not have had the chance without Concordia's flexible programming structure which has enabled them to take their degrees either full-time or part-time, day or evening.

Tracing its roots back over 100 years, Concordia has weathered economic depressions, population booms and just about everything else while offering some of the most innovative and exciting education in North America. And all without becoming an ivory tower.

Concordia today maintains its tradition of concern for the individual. Wherever possible, students are given the opportunity to plan programmes to suit their own needs and circumstances. They can enter the university in September, and, in some cases, in January or May.

THE FOUR FACULTIES

Concordia's academic departments and associated institutes are grouped into four Faculties: Arts and Science, Commerce and Administration, Engineering and Computer Science and Fine Arts. Together they offer more than one hundred and eighty academic programmes leading to eight undergraduate, seven graduate and fifteen doctoral degrees. Some programmes are quite traditional, while other reflect the university's innovative response to society's changing needs.

Classes are small - so students find professors very accessible. Classes are split between the two campuses. Concordia has both an urban and suburban setting. Its modern Sir George William's Campus is right at the heart of downtown Montreal while its more traditional Loyola campus is nestled in a 50- acre tree-lined setting in the residential west-end. Depending on their programmes, students study on one or other of the two campuses, although in many cases, they may study on both. A free shuttle-bus service conveniently connects the two campuses.

Classes run from early in the morning until late at night. In all, Concordia has over 25,000 full-time and part-time students enrolled in some 185 programmes within its four faculties.

The lively presence of Graduate Studies with its 61 programmes adds much to the Concordia milieu.

Concordia has an excellent reputation in teaching & research. Its core of professors is recognized as having the highest number of PhDs teaching at the undergraduate level of all Canadian universities. In addition, as active practitioners in their fields of expertise, practical experience is often combined with theory in the classroom.

Montreal

Concordia counts Montreal itself as an invaluable asset to the university experience. Situated on an island where the St. Lawrence and Ottawa Rivers meet, the city provides an endlessly fascinating cosmopolitan environment. Although French is the language heard most often in the shops and streets, more than a third of the population is

English-speaking. A wide range of ethnic groups - Chinese, Greek, Italian, Portuguese and Vietnamese, among them - also maintain their language, culture and cuisine, as evidenced by the city's multilingual cinemas and its wide variety of restaurants, corner grocers, fish merchants, bakeries and other specialty shops.

As one of the oldest cities in North America, Montreal is steeped in history and tradition. In Old Montreal, down by the harbor, you can stroll along narrow cobbled

streets and look at seventeenth-century and eighteenth-century buildings. Yet Montreal is also a city with as lively a downtown as you can find anywhere, with an impressive array of modern buildings, boutiques, eateries and shopping plazas.

Montreal is also a centre of national and international cultural events like the Jazz and World Film Festivals. You can see world-renowned performers at places like Place des Arts or lesser-known "vedettes" at small clubs known as "boîtes à chansons".

Whatever your tastes, this metropolis of two million is big enough to provide for them. There are concerts, plays, films and art shows. Montreal is also the home of the Forum and Olympic Stadium, where the Canadiens play

Montreal

hockey and the Expos baseball. Being a university town, Montreal is host, as well, to a steady stream of lecturers, authors, film makers, politicians and community leaders of all types. The city's four campuses - two English and two French - are all within easy travelling distance of one another.

Even if you're on a limited budget, as most students are, you'll never be short of things to do. When you feel like taking a break from your studies you can spend time with friends in an outdoor café or an intimate bistro, attend a free concert in a local church, or get away for a stroll on Mount Royal. The mountain has plenty of wide open spaces for jogging, hiking, cross-country skiing, or just plain relaxing.

And if you get tired of the hustle-and-bustle of urban living, you can easily beat a retreat to the nearby Laurentian Mountains or the Eastern Townships, where you can do everything from wind-surfing to skiing (alpine as well as cross-country), or just explore the beautiful countryside. It's all within an hour or two of Montreal.

Men's Basketball

The Men's Basketball Programme at Concordia University has been a model of consistency since it came into being in 1975. The teams of two great rival schools - Sir George Williams and Loyola College, united to form a team that has averaged 20 wins per season since its inception. In the early seventies, the Loyola/Sir George confrontations were the most heated of any two schools in Canada.

Concordia has been one of the most successful basketball teams in the CIAU, winning an unprecedented string of 66 consecutive games in league play from 1968-1972. They also have the best record against N.C.A.A. competition in Eastern Canada. The

Stingers have won eight conference titles since 1975 while compiling an impressive record of 261-141. The 1989-90 season saw the Stingers win their first ever National title.

Individually, there have been nine Stingers named to the C.I.A.U. All-Canadian Team. Concordia Basketball has strived for excellence both academically and on the court.

The Stingers have graduated over 80% of its players who began their third year with the maroon & gold. Five Stingers in the past three years have received Quebec Foundation Scholarships for combining athletics with a fine academic record.

The Concordia philosophy is straightforward; give the student-athletes an opportunity to develop as people in an academically structured environment. Concordia has attracted players from all over the world to its basketball programme.

Coach John Dore believes that "Concordia Basketball gives its athletes a fine schedule, great support services and an outstanding tradition of excellence". The Stingers welcome any student-athlete who wants to compete at a high level while obtaining a top notch education.

Women's Basketball

The Women's Varsity Basketball team has a strong record of success at both the provincial and national level. Although the team is rebuilding, the Stingers were once the toast of Montreal. Since 1975 the Stingers have won five provincial titles while finishing third in the nation on two separate occasions.

Concordia competes in one of the toughest conferences in all of Canada. They supplement their Q.S.S.F. league games with several tournaments in Eastern Canada. However, academics are given top priority with the women's basketball programme, and their schedule reflects this.

The Stingers have produced several All-Canadians and National Team Members. Sylvia Sweeney and Liz Silcott were both members of the 1976 Canadian Olympic Team. The maroon and gold last participated in the Nationals in 1985 when they were led by Q.U.A.A. All-Star Jane Bullock and her 24 points per game average.

Although the program has produced 23 conference All-Stars since 1975, studies remain a priority. Over 92% of all team members have received their degrees at Concordia. "The team offers a great opportunity for student athletes to compete with the top players in Canada while working toward a degree", notes coach Louisa Zerbe.

BASKETBALL

Men's Hockey

Men's Varsity Hockey at Concordia University is committed to the development of hockey excellence in combination with academic success. In 1975 when the team began competing in the QUAA, the team was formed from two great traditions of college hockey; the Loyola Warriors and the Sir George Georgians. The Loyola tradition goes back to 1899, when a group of Loyola students played for and actually won the Stanley Cup. The Sir George team, began to develop in 1963 when the University hired its first full-time coach. In the late 60's and early 70's the Sir George/ Loyola rivalry was the greatest in the history of college hockey in Canada.

Since 1975-76 the Stingers have won nine league titles, compiled the best record in Canadian college history against NCAA and European competition, and won more tournaments than any other university in Canada. They have travelled to Europe three times: in 1976 when they were the first university team ever to tour Czechoslovakia; then in 1980 the Stingers won the first-ever British Challenge Cup in Dundee, Scotland; and more recently they made their second trip to Czechoslovakia in 1986-87, playing nine games in and around Prague.

Although the programme has produced 12 All-Canadians and graduated over 40 players to professional hockey, such as Bernie Wolf, Washington Capitals, Larry Carriere, Buffalo Sabres, Jim Corsi, Edmonton Oilers and now with the Italian National Team; studies remain a priority for the Concordia hockey player. Concordia is proud of its record of academic achievement graduating over 90% of all varsity players. The Concordia philosophy is clear; give athletically gifted students an opportunity to develop their hockey skills in a disciplined academic environment. This is the secret of Concordia's success.

The Stinger coaching staff is headed by Yves Beaucage who recently took over the leadership of the team from Paul Arsenault, who has guided all three teams to 16 league titles over the past 25 years. With a top coaching staff, a tradition of achievement, academic credibility, and an outstanding schedule, Concordia is the place for the serious student hockey player.

Women's Hockey

Women's hockey at Concordia began over twenty years ago with the Loyola Tommies and as a result is one of the oldest university women's hockey programmes in Canada. In the past three years the University has placed a greater emphasis on women's programmes and the Stingers have benefited from this policy.

Concordia competes in the Quebec University League, playing their home games at the Loyola Athletic Complex. The schedule includes 15 league games, 10-15 exhibition games, and as many as five tournaments in a season which runs from early October until mid-March. The Stingers also host their own tournament, the Theresa Humes Invitational. Concordia hopes to compete in the East Coast Athletics Conference (ECAC) in the early 1990's, and is working toward the possibility of hosting the first Canadian University National Championship.

Women's hockey at Concordia continues to succeed. Adds Coach Lea Lawton, "it offers an excellent opportunity for players to compete at a high level while at the same time working toward a university degree".

Men's Rugby

The Concordia men's rugby team is the newest sport on the block, entering its second year and for the first time competing in the Quebec Student Sport Federation. The sport first came into prominence at the University in the early 1980's when the Rugby Football Club registered several tournament victories. However, without a league to play in the club was unable to build up any consistency in the programme.

The club continued to operate and competed its first year in 1988 when they fielded two sides and narrowly lost 12-10 to the provincial champions. While producing such provincial team players as Graham Winter, James Patterson and Craig McDevitt. In 1989 the University recognized the rugby club as an interuniversity team as a means of raising the profile of the team and to provide leadership in the development of the rugby programme. The Department has worked with the QSSF to develop a men's league and to help the team set up a feeder system through the club structure.

In its first year under the department's umbrella, the team again fielded two sides and recorded respectable 3 and 3 and 1 and 3 seasons.

With an influx of experienced players from CEGEP and other schools, the future of Concordia rugby is indeed looking good.

As with other Concordia teams, being a student remains a high priority for the men's rugby programme with the development of study or academic support seminars for members of the team.

The players and staff feel that the Concordia University Football Rugby Club has a bright future.

Women's Rugby

The women's rugby team came into existence in 1987 and has competed in the Quebec Student Sport Federation league, which consists of Quebec CEGEPs and universities. During the past few years they have shown consistent improvement. League opponents include Bishop's, McGill, Marianopolis, Champlain and John Abbott with a playoff tournament for the top four teams. National team member Micheline Green and veteran Chris Regimbal are two outstanding players who have played for Concordia the last few years.

Women's rugby at Concordia benefits from the various resources offered by the department to its student-athletes. The department is actively working with the QSSF to develop the existing programme within the provincial circuit.

The University sees that the future direction of the programme is to develop a strong feeder system in order to ensure Stinger teams will remain competitive as well as taking a leadership role in the development of Quebec Rugby. As with Concordia's other inter university teams, the programme's focus is on the pursuit of academic and athletic excellence.

Rugby

Larry Tittley

For a professional football player, Larry Tittley was a relatively small player. But this fact of life was just another challenge to Larry. By focussing on superior mental and physical conditioning, Larry was able to fulfill his boyhood dream with a first career that saw him play for the Calgary Stampeders, Ottawa RoughRiders and Montreal Concordes between 1976-85.

"I have always brought the same focus on objectives to my life" says Larry, who majored with a B.A. in Economics. "My degree gave me a solid understanding of how the world of economics is structured - something I was able to use in organizing my own life".

This combination of focus and knowledge has served Larry well in his second career. He is now in Sales Management with the Investors Groups Ltd.

Summing up his dual expertise, Larry concludes that whether in sports or business it's best that "you plan your work and then work your plan": a principle that has certainly paid off for Larry.

Laurie Brodrick

The maxim "healthy body/healthy mind" best describes Laurie Brodrick's approach to combining her career with a natural love for sports.

"I've always believed in stretching myself - in being active and involved" says Laurie. She brought this energy and enthusiasm to Loyola's Women's Hockey Team, which she captained for three of the four years she played for the team, as well as to her studies which saw her graduate with an Honours B.A. in Spanish.

"At Loyola, they always encouraged us to try and excel at both levels - academic and athletic - and each always accommodated the other" she adds.

This philosophy has served Laurie well. She went on to obtain an M.A. in Spanish before launching a successful career in banking where she is now a Senior Account Manager with the Royal Bank.

A final word of advice from Laurie to all athletes at whatever level - "Never underestimate what you can learn about yourself from sports, particularly team sport."

Bernie Wolfe

Bernie Wolfe started his hockey career at Sir George Williams University (one of Concordia's two founding institutions) and capped it by being named "Athlete of the Year" in 1973. This led in turn to an offer from the Washington Capitals where his four-year career as goaltender included being named the team's Most Valuable Player.

"I was extremely fortunate to have been able to get a top grade education and also participate in a varsity sport. I had four of the most memorable years of my life at Sir George Williams University. The combination of the academic experience as well as the athletics has helped me considerably with my second career as a financial planner."

Bernie is now the president of Bernard R. Wolfe and Associates, Inc., a Financial Service Company in Rockville, Maryland, USA. He is also a Certified Financial Planner and a Registered Investment Advisor. In addition to working with over 600 clients, Mr. Wolfe has a regular radio show on WTOP. He has also been the subject of several articles in newspapers and magazines including *The Washington Post*, *The Wall Street Journal*, *USA Today*, and *Washingtonian* magazine.

Looking back, Bernie Wolfe sums it up "I could never have gotten started in business without the strong financial background I acquired in college."

Larry Carrière

Well known to hockey fans across Canada, Larry Carrière retired from the tough physical demands of life as a professional athlete in the National Hockey League in 1980 having achieved the first of two major career goals.

"Before I went to University, I was already considering the possibility of becoming a professional athlete", observes Larry. "It was then that my father gave me some excellent advice. What he said was basically this - professional sport is short-term; academic credentials are long term. Combine them both".

With that philosophy in mind, Larry found the perfect environment at Loyola College (one of Concordia's two founding institutions) where he graduated with a B.Comm. while playing for the University hockey team for all four years of his degree programme.

"I'm glad to see that Concordia has kept that important balance between academic studies and athletics. It has served me well" notes Larry.

Indeed it has. Larry is now pursuing the second of his two career goals as a Vice-President of Canadien Cardiovasculaire Ltée., and as a Scout for the Buffalo Sabres.

Men's Soccer

The men's varsity soccer team of Concordia University boasts a rich tradition of success at the provincial and national levels; the Stingers won the CIAU national championship in 1976 and have competed in the national finals on numerous occasions.

Exhibition matches in early September open the two month regular season schedule which concludes with the provincial and national playoffs. The team also competes in competitive tournaments in Ontario, Quebec, and the North-East region of the United States.

The Stingers' games are marked with speed, fitness, and a skill level that makes them appealing to players and fans alike. The continued rivalry within the F.Q.S.E. is typical of the high-calibre university soccer played in Quebec.

The game of soccer is the most popular sport in the world and that, in a way, is reflected in our soccer programme here at Concordia. The inter-university team has a strong international flavour, providing the players with enriching cultural experiences combined with strong academics programmes.

Women's Soccer

The women's soccer programme has jumped way ahead of the crowd. The difference? A commitment to a total team concept. A new coaching staff instilled a sense of consistency in team discipline and policies. "We think of each team member as a link in our chain. If one link doubts our goal, the chain breaks. The eleven players on the field depend on each other. There is a responsibility upon each and everyone."

In its quest for excellence, the women's soccer programme is under annual planning. The athletes are involved year round in league play, tournaments, and both indoor and outdoor competition, and it pays! In the first year of implementation of this renewed programme, the team won the 1988 Quebec University Athletic Association (QUAA) championship title and took part in the Nationals held in Vancouver. Concordia's women's soccer machine is now well-known in the country for its strength and efficiency, and commitment to academics.

Soccer!

Alpine Ski

Varsity skiing at Concordia has been in existence for ten years. The ski programme is the only self supporting team at Concordia and is committed to fostering excellence in both academics and competitive ski racing. The Stingers have managed to rebuild their programme into one of the finest in North America. Concordia has attracted many fine student athletes since it joined the Quebec Ski Circuit.

Several former National Team members have joined the team in recent years because of its outstanding schedule and fine record of achievement. The Quebec ski circuit is now one of the best in the world university sports scene. Last season, the Stingers won both the men's and women's disciplines in Quebec as well as the CAN-AM race featuring the best racers in North America.

Despite the top notch competition, academics take priority. Team members miss very few classes and several athletes have won academic

scholarships while at Concordia. Prospective student athletes can expect good coaching and team cohesiveness thanks to the fine support services in the Athletic Department.

Football

Concordia's commitment to football excellence began with the Loyola Warriors in 1915. While the game has changed since then, Concordia's ability to offer quality education in combination with elite athletic competition has not. The Stingers became a member of the Ontario-Quebec Interuniversity Football Conference in 1975 and have fielded competitive teams ever since. The late seventies and early eighties produced some particularly strong clubs, with the 1982 squad winning the OQIFC championship and playing in the national semi-finals.

While the team is very proud of the number of players it has sent to the professional ranks, it is prouder still of its academic record. To date, a remarkably high percentage of Stinger players have received their degrees from Concordia. This aspect of the Concordia experience remains critically important to the team, because when the cleats are put away for the last time, the athlete needs more than memories to fall back on - he needs an education.

By fielding hard-hitting, disciplined and offensively creative teams, Concordia Head Coach Pat Sheahan looks forward to bringing national acclaim to the Stinger football program in the 1990's.

Sheahan's acceptance of the coaching position with the Stingers at the start of the 1989/90 season marked a "homecoming" of sorts. His previous association with the team was as a player. In all, Pat contributed five memorable years to the programme; two of them as team captain.

Women's Volleyball

The Concordia Women's Volleyball programme began in 1988.

This past season the team enjoyed a productive, progressive, and competitive atmosphere. In the years to come we are building and developing a club structure which is geared toward a combination of excellence in academics and athletics.

"We provide an experience which not only teaches athletes about basic and advanced technique in volleyball, but how these learning processes and challenges relate to real-life situations", observes coach Melanie Sanford-Moore.

The programme includes a full-time Level IV head coach, one part-time assistant coach, athletic therapy, secretarial services, and an academic advisor.

We believe in the complete development of our players both athletically and academically, and are looking for players who wish to become involved in programme promoting excellence in volleyball.

Wrestling

The Concordia University Wrestling Team began in 1977 under head coach Victor Zilberman, a former Soviet national champion and bronze medalist in the 1974 World Championships. The team functions and benefits from its association with the Montreal Wrestling Club, which also serves as a Primary National Training Center.

The strength of the Concordia Wrestling Team lies in its coaching staff which includes 1988 Olympic Team coach Zilberman, 1988 Espoir World Cup coach Rob Moore, National Sombo Wrestling coach Bruce Ross, and sport psychologist Dr. Dan Marisi. The brother tandem of Pat and Mike Sullivan, both former CIAU champions, act as assistant coaches.

The programme has developed top international wrestlers such as George Gunovski, Wyatt Wisart, Gary Kallos, and more recently, Clark Davis, Doug Yeats, Serge Marcil and Pat Sullivan. All have been medallists at the international level.

Over the years, the programme has expanded greatly, from a few talented and committed individuals into a strong team. In 1989 they won an incredible sixth consecutive CIAU Team championship.

The Concordia University Wrestling Team; one of the most successful programmes at university and world level.

Admission

General Admission Policy

In keeping with the general principles accepted by the Quebec universities, the policy of Concordia University is that admission is open to any qualified applicant, in the programme of his or her choice, within the limits of its resources. In the case of programmes where demand is heavy, available resources may make it necessary to limit the number of persons admitted. This means that there will be, regrettably, cases where qualified applicants must be refused. In such cases the University will accept those applicants who have the best qualifications and potential. The University has a long tradition of service to adult and part-time clienteles, and this service remains a vital part of its mission. The University undertakes to give fair consideration to all applications and to inform the applicant of its decisions and the basis for them within a reasonable period of time.

These admission requirements are general; for detailed information on admission requirements and criteria, please refer to the Admissions Guide.

Admission Information

Entry Dates

Students normally begin full-time or part-time studies in September. Entry in January or in the Summer Session, however, may be possible. You should consult the Admissions Office for additional information. International students are not normally admitted in January.

Admission Deadline Dates

Full-Time:

March 1 and November 1 are the application deadline dates normally set for the Fall and Winter Terms respectively. Late applications are considered wherever appropriate. You can obtain further information from the Admissions Office.

Part-Time:

Applications should be submitted well before the start of the term to allow sufficient time for evaluation and notification. Candidates for the Fall and Winter Terms should apply before July 15 and November 1. NOTE: part-time applicants to the Faculty of Fine Arts should apply before March 1.

Application Fee

There is a non-refundable application fee of \$15.00 (Canadian).

Admission Requirements

Applicants from Quebec Institutions

Successful completion of a two-year pre-university programme in a CEGEP, with the award of a Diplôme d'Études Collégiales (DEC) (or the equivalent), including the specific courses required by the various programmes (profil). (See appropriate Faculty section in the Admissions guide).

Applicants who have completed a professional (career) programme in a CEGEP are also admissible to the University. Students admitted to a particular programme at the University who subsequently wish to change to another programme may have to complete specific prerequisites in addition to their regular programme requirements.

Applicants from other Canadian Provinces

Grade 12 applicants from other Canadian provinces with an average of at least 65% in appropriate subjects will be considered for admission to the Extended Credit Programme, normally requiring 4 years of study.

While the University is flexible regarding entrance papers, and no set pattern of high school courses is required, the courses presented should be appropriate for the Faculty to which application has been made.

Ontario students entering programmes in the Faculty of Arts and Science or the Faculty of Fine Arts will be awarded six advance standing credits for each Grade 13 or OAC course in the humanities or social sciences with a minimum passing grade of 70%, up to a maximum of 30 credits.

Applicants from the United States

High School graduates with high standards from accredited schools who have followed an academic programme designed for university entrance may apply for admission to an Extended Undergraduate Programme of approximately 120 credits.

Applicants are required to have a better than average school record and a high ranking in their graduating class. While no set pattern of courses in high school is required, all applicants are expected to have taken four units of English. Those applying for admission to Science and Engineering must include three or four units in Mathematics and two in the Sciences. At least three units of Mathematics are recommended for admission to Commerce and Administration. The Admissions Office may approve slight deviations from the above pattern.

Students who have successfully passed Advanced Placement examinations in appropriate subjects with a grade of '3' or better may be granted some advanced standing.

Mature Student Entry

For many years, Concordia has made it possible for men and women of 21 years of age or over, who have interrupted their studies to undertake work towards university degrees and certificates, although they lack the normally required pre-university schooling.

Mature entrants are expected to demonstrate the potential to follow undergraduate courses, and are required to complete successfully a minimum of 18 additional credits over and above those required of students who enter with the regular qualifications. Mature entrants are, however, considered and treated in every way as undergraduates.

Cost at Concordia

Estimated Costs of Undergraduate Studies (as of September 1990)

Full-time Students:	Living at Home	Living on Campus	Living in Apartment
1. University Fees: Tuition	\$ 880.	880.	880.
Non Academic (includes Student Services, Student Association and others)	290.	290.	290.
	1170.	1170.	1170.
2. General Expenses*			
Books and Supplies	500.	500.	500.
Room		1625.	1600.-2000.
Food		1800.	1800.
	500.	3925.	3900.-4300
3. Personal Expenses*			
Transportation	250.		250.
Miscellaneous	700.	700.	700.
	950.	700.	950.

*General and Personal expenses listed are estimates and are subject to personal needs.

NOTE: The figures are estimates for full-time students (30 credits) for eight months. When eligibility for financial aid is determined, it will be based on most current costs. Fees are subject to change without notice.

STATEMENT: The Ministère de l'Enseignement supérieur et de la Science is presently reviewing university tuition fees.

Part-Time Students: (including Visiting students)

Tuition fee per credit	\$ 29.33
Student Service fee per credit	4.25
Student Association fee per credit	1.80
Academic Materials fee per credit	3.50
Total per credit	\$ 38.88

Total fees for a 6-credit course will thus be	\$ 233.28
Total fees for a 3-credit course will thus be	\$ 116.64
